

# Three crisis

## **Climate crisis**

Probably the biggest challenge for humanity this century

## **Biodiversity crisis**

With an irreversible loss of species

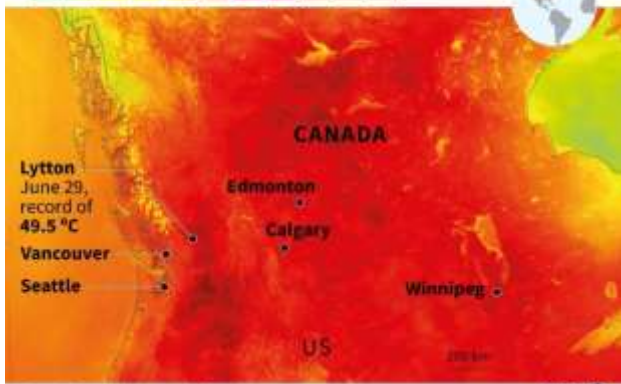

## **Resources crisis**

When our ecological footprint is far beyond the limits of what nature renews every year

## Extreme heat in Canada and the US

Forecast temperatures to July 1

Global Footprint Network, 2021 National Footprint and Biocapacity Accounts

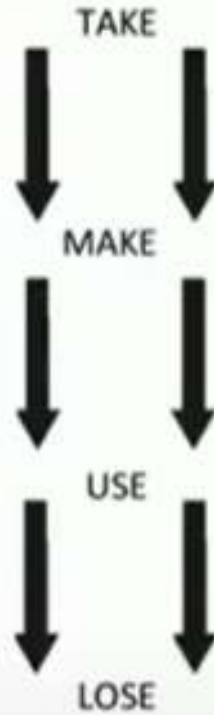

“There are two ways to have enough.  
One is to continue to accumulate  
more and more.  
The other is to desire less.”

G. K. Chesterton, *All things considered*, 1908

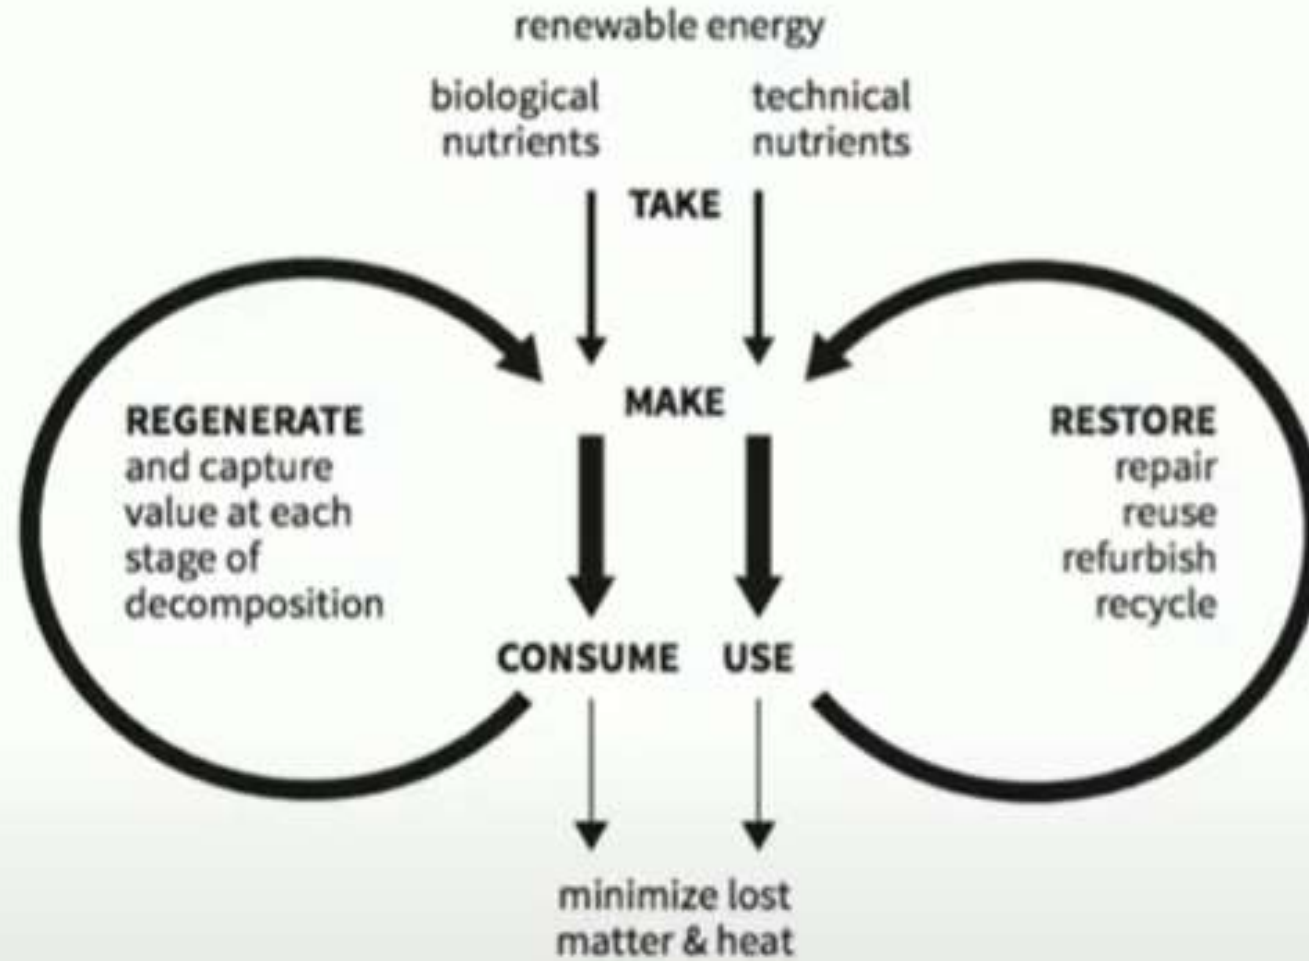

# One sustainable solution

# DEGENERATIVE

# REGENERATIVE

# Until now

Wealth  
Continuous growth  
Efficiency

Have more  
Unsatisfaction

# For the future

Well-being  
Quality  
Sufficiency

Sufficient  
Frugality  
Parsimony
